

IN THE CLAIMS:

Please amend the claims as follows:

--1. (canceled).

2. (currently amended) The method of claim [1] 28, wherein the data page is received over a wireless connection.

3. (currently amended) The method of claim [1] 28, wherein the second orientation is a ninety-degree rotation of the first orientation.

4. (currently amended) The method of claim [1] 28, wherein the device comprises a display that is significantly larger in a first dimension than in a second direction orthogonal to the first dimension.

5. (currently amended) The method of claim [1] 28, wherein the data page is redisplayed in response to a user input.

6. (currently amended) The method of claim [1] 28, wherein the data page is redisplayed after a preset duration.

7. (currently amended) The method of claim [1] 28, wherein in the portable device is a wireless telephone.

8. (currently amended) The method of claim [1] 28, wherein the portable device is a personal digital assistant.

9. (canceled).

10. (canceled).

11. (currently amended) The portable data processing system of claim [10] 29, wherein the data page is received over a wireless connection.

12. (currently amended) The portable data processing system of claim [10] 29, wherein the second orientation is a ninety-degree rotation of the first orientation.

13. (canceled).

14. (currently amended) The portable data processing system of claim [10] 29, wherein the data page is displayed in response to a user input.

15. (currently amended) The portable data processing system of claim [10] 29, wherein the data page is redisplayed after a preset duration.

16. (currently amended) The data processing system of claim [10] 29, wherein the portable data processing system is a wireless telephone.

17. (currently amended) The data processing system of claim [10] 29, wherein the portable data processing system is a personal digital assistant.

18. (canceled).

19. (canceled).

20. (currently amended) The computer program product of claim [19] 30, wherein the data page is received over a wireless connection.

21. (currently amended) The computer program product of claim [19] 30, wherein the second orientation is a ninety-degree rotation of the first orientation.

22. (canceled).

23. (currently amended) The computer program product of claim [19] 30, wherein the data page is redisplayed in response to a user input.

24. (currently amended) The computer program product of claim [19] 30, wherein the data page is redisplayed after a preset duration.

25. (currently amended) The computer program product of claim [19] 30, wherein the portable device is a wireless telephone.

26. (currently amended) The computer program product of claim [19] 30, wherein the portable device is a personal digital assistant.

27. (canceled).

28. (new) A method for displaying data on a portable device having a display that is significantly larger in a first dimension than in a second dimension, said method comprising the steps of:

receiving a data page in the portable device;

analyzing the data page; and

automatically displaying the data page in either a first orientation or a second orientation within the display in response to the analysis of the data page.

29. (new) The portable data processing system having a processor, writeable memory and a display which is significantly larger in a first dimension than in a second dimension, said portable data processing systems comprising:

means for receiving a data page in the portable data processing system;

means for analyzing the data page; and

means for automatically displaying the data page in either a first orientation or a second orientation within the display in response to the analysis of the data page.

30. (new) A computer program product for use within a portable data processing device having a display that is significantly larger in a first dimension than in a second dimension, said computer program product comprising:

media readable by the portable data processing device;

instructions embodied within the media for receiving a data page within the portable data processing device;

instructions embodied within the media for analyzing the data page; and

instructions embodied within the media for automatically displaying the data page in either a first orientation or a second orientation within the display in response to the analysis of the data page.
